

## Chamber of Commerce hosts technology challenge demonstration

The Warren County Regional Chamber of Commerce will be offering Warren County businesses the opportunity to evaluate and improve their technological proficiency at the Chamber's Secrets of Success Luncheon, January 23, 2008 11:45 a.m. at Architect's Golf Club in Phillipsburg.

The focus of the event is the Technology Challenge, an on-line performance-based assessment

tool that enables participants to test their skills in common business software applications such as word processing, spreadsheet, presentation and Internet. The pilot program, scheduled to launch in February, will provide participating businesses with free, unlimited access to the on-line program in two areas: determining the skill level of current employees for training purposes

and evaluating the skills of a job applicant.

The Technology Challenge is being conducted in partnership with the New Jersey Chamber of Commerce. Registration forms will be available for business interested in participating in the pilot.

To register for the Secrets of Success Luncheon, email the Warren County Regional Chamber of Commerce at [rsvp@warrencountychamber.org](mailto:rsvp@warrencountychamber.org), or contact the main office at 10 Brass Castle Road, Washington, NJ 07882, 908 835-9200.
